NUCLEAR PUSION SUBJECT INDEX

Evaluation of fuel resources and requirements for

the magnetic fusion energy program
[MLM-2419] 25 p0164 N80-14570
Nuclear power program information and data:
Update, March - April 1979
[DOZ/TIC-10119] 25 p0166 N80-14894
NUCLEAR PUSION

Preliminary assessment of industrial needs for an advanced ocean technology
[NASA-CR-162435] 25 p0118 880-11747
Development of in situ marine seismic and geotechnical instrumentation systems
[SAND-79-0868C] 25 p0137 N80-13431
OCEAN CURRENTS

NAM CURRENTS
Waves, currents, tides - Froblems and prospects
25 p0049 A80-17134

Search for fusion power	OCEAN DATA ACQUISITIONS SYSTEMS
[UCRL-81890] 25 p0132 N80-12900	Development of in situ marine seismic and
Pusion power program	geotechnical instrumentation systems
[ANL/PPP-78-4] 25 p0 149 N80-13941	[SAND-79-0868C] 25 p0137 N80-13431
Evaluation of fuel resources and requirements for	OCEAN THERMAL ENERGY CONVERSION
the magnetic fusion energy program	Salinity gradient power - Otilizing vapor pressure
[MLH-2419] 25 p0164 N80-14570 Pusion energy for hydrogen production systems	differences
engineering of a process for hydrogen production	25 p0003 A80-10524 Is there a chance for OTFC
from nuclear fusion	25 p0007 A80-11394
[BNL-24906] 25 p0180 N80-15897	Energy from ocean thermal gradients
Pulsed power for fusion	25 p0044 A80-16652
[SAND-79-0933C] 25 p0181 N80-15908	Ocean thermal energy conversion /OTEC/ - Social
Superconductivity for mirror fusion	and environmental issues
[UCRL-81693] 25 p0 181 N80-15933	25 p0049 A80-17135
Fusion: A possible option for solving long-term	Ocean energy - Forms and prospects
energy problems	25 p0061 A80-18162
[PB-300692/1] 25 p0181 N80-15946	OTEC - Solar energy from the sea
NUCLEAR HEAT	25 p0085 A80-20424
Possible improvements to a basic cellular thin blanket fusion reactor configuration	OTEC - A comprehensive energy analysis
25 p0081 A80-19664	25 p0085 A80-20456 Utilization of ocean heat for hydrogen production
General-purpose heat source project space nuclear	25 p0086 A80-20686
safety program and radioisotopic terrestrial	A thermodynamic assessment of OTEC open-cycle
safety program plutonium oxide	power systems
[LA-7519-PR] 25 p0118 N80-11889	25 p0088 A8C-20886
NUCLEAR POWER PLANTS	OTEC thermal resource report for Caribbean Sea
Laser fusion - Energy application perspectives	Plant Ship 13-15 degrees N 75-80 degrees N
25 p0030 A80-12883	[HCP/T2898] 25 p0113 N80-11599
Evaluation of nuclear power plant siting by	Foam solar sea power: A physical investigation
probabilistic assessment of environmental impact	25 p0122 N80-12548
[VTT-EN-24] 25 p0118 N80-11891	Thermoelectric ocean thermal energy conversion
Land-based application of an OTEC open-cycle power	[SERI/TP-35-254] 25 p0124 N80-12564
system	Ocean Thermal Energy Conversion (CTEC) platform
[CONF-790631-3] 25 p0 144 N80-13676	configuration and integration, executive summary
Nuclear power program information and data:	[DOE/ET-4064-1] 25 p0 128 N80-12600
Update, March - April 1979	Condensation and evaporation heat transfer with
[DOF/TIC-10119] 25 p0166 N80-14894	low-boiling temperature fluids for ocean
Analysis of potential implementation levels for	thermal and geothermal energy conversion
waste heat utilization in the nuclear power	[CONF-790539-1] 25 p0137 N80-13412
industry	OTEC platform configuration and integration.

LUMES	25 p0042 A80-16146	[PB-299575/1] Sulfur fixation during coal gasifi	
Ambient air measurements of petrol emissions	25 p0018 A80-11992	desulfurizing to reduce air poll [PB-301104/6] EPA utility FGD (Flue Gas Desulfur December 1978 - January 1979	25 p0169 N80-15296 ization) survey:
Measurements of gas-to-particle co plumes from five coal-fired elec	tric power plants 25 p0089 A80-21010	plants [PB-259399/6]	25 p0179 N80-15682
COTONION OXIDES  General-purpose heat source develones  Design requirements  [LA-7385-SR]	25 p0114 N80-11608	Pilot scale evaluation of NOx comb for pulverized coal, phase 2 [FB-299325/1] Investigation of the effects of th of an oxidation catalyst on a di	25 p0180 N80-15687 ne installation
General-purpose heat source project safety program and radioisotopic safety program plutonium oxi	: terrestrial .de	vehicle [FB-299928/2]	25 p0180 N80-15699
[LA-7519-PR] PHEUHATIC EQUIPMENT Hodeling and experimental analysis	25 p0118 N80-11889 s of a fluidic	POLLUTION MONITORING Analysis of tarry fractions in em- from low temperature oxidation of	issions resulting of brown coal 25 p0007 A80-11448
generator [ASME PAPER 79-DET-9] POINTING CONTROL SYSTEMS	25 p0041 A80-15705	Ambient air measurements of petro: emissions	leum refinery  25 p0018 A80-11992
Heliostat Beam Characterization S computerized video radiometer to solar collector	ystem echnique for 25 p0022 180-12627	Measurement of gaseous hydrogen cl from municipal refuse energy rec the United States	hloride emissions
An electronic device for intermit			25 p0019 A80-12128
of sun in solar collectors	25 p0027 A80-12782	Laboratory evaluation of two lases systems	25 p0031 A80-12964
POLARIZATION (CHARGE SEPARATION) Synthetic molecular organizates	25 p0073 A80-18752	Energetics aspects of environments	al protection 25 p0072 A80-18733
POLICIES A policy-sensitive model of techno	ology assessment 25 p0004 A80-11140	Measurements of gas-to-particle con plumes from five coal-fired elec-	
POLITICS Soft and hard energy paths - The : political, technical and ph	roads not taken	POLYCHYSTALS  Efficient indium tin oxide/polycr  solar cells	ystalline silicon
aspects of energy problem	25 p0007.480-11400	Silicon materials outlook study f	25 p0039 A80-15136 or 1980-1985
POLLUTION CONTROL		calendar years	05: 0455 NOO 18400
Economics of Pullman Kellogg's ma FGD system Flue Gas Desulfu	gnesium promoted rization 25 p0014 A80-11961	[NASA-CR-162541] POLYESTERS Solar concentrator with polyester	25 p0155 N80-14492
Vehicle emissions control and its development	effect on engine	reflecting surface and pendulum tracking movement	arrangement for 25 p0027 A80-12784
Hydrogen - The Denver story	25 p0C37 A80-14708	POLYMER CHEMISTRY	<del>-</del>
An optimization model for overall	25 p0038 A80-14709 urban energy	Phosphoric acid fuel-cell electro pyropolymer ceramic composites	catalysts from 25 p0012 A80-11861
planning	25 p0038 A80-14844	POLYMER MATRIX COMPOSITE MATERIALS Materials program for fiber compo	-
The use of oil shale for SO2 emis atmospheric-pressure fluidized-	bed coal combustors 25 p0064 A80-18505	[UCRL-81724] POLYMBRIC FILMS Photovoltaic energy conversion in	25 p0115 N80-11618
Fiscal year 1978 experiences at T unit 8 limestone scrubber [ASME PAPER 79-WA/APC-10]	25 p0071 A80-18623	Corrosion protection of solar-col	25 p0154 N80-14477 lector heat
First experiences with the use of large power plants	impactors in 25 p0 C74 A80-18859	exchangers with electrochemical [COO-4297-1] POLYMERS	ly deposited films 25 p0171 N80-15569
Experiences with the practical us cascade impactor in the exhaust industrial sites	e of an Andersen gas of various	Design and development of a 30 wa electrolyte fuel cell power sou calcium hydride	tt solid polymer cree fueled with 25 p0139 N80-13625
Control technology for coal-fired Northeastern U.S. A - Overview	25 p0074 A80-18861 combustion in and sulfur	[AD-A071157] POLYSTYBENE Experimental techniques and mathe	•
emissions control. B - Particul combined systems	ates, NOx and 25 p0074 A80-18883	the study of waste pyrolysis an PONDEROMOTIVE PORCES	d gasification 25 p0001 A80-10028
Wastewater treatment in coal conv [PB-297587/8] Technical assessment of thermal I	ersion 25 p0104 N80-10700	Nonlinear modification of resonan trajectories due to pondero cylindrical plasma	omotive force in
for coal fired boilers [PB-297947/4]	25 p0117 N80-11656	PONDS .	25 p0006 A80-11347
Environmental assessment report: gasification systems for SNG [PB-298109/0]	25 p0120 N80-12204	Solar pond concepts: Old and new [SERI/TP-35-208] POROUS MATERIALS	25 p0102 N80-10663
rundamental and semi-global kinet hydrocarbon combustion mode	ic mechanisms of	<pre>Improvement of the high-rate disc   of the nickel electrode</pre>	
environmentally clean power pla	int design 25 p0165 N80-14587	POROUS PLATES	25 p0010 A80-11841
[C00-4272-3] Effects of conditioning agents of coal-fired boilers: Test report the coal-fired boilers:	n emissions from	A high performance porous flat-pl	late solar collector 25 p0021 A80-12438

POWER CONDITIONING Flywheels for energy storage	Dynamic modeling of H2S clean-up processes in
25 p0019 A80-12166	coal gasification 25 p0088 180-2088
Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized	PRESSURE DISTRIBUTION
Solid-State-Satellite Solar-Power Station	Dependence of ideal MHD beta limits on current density and pressure profiles
25 p0038 180-14948	25 p0054 A80-1779
Heat pipe cooled power magnetics [NASA-CR-159659] 25 p0136 N80-13362	PHESSURE EPPECTS
Photovoltaic concentrator application experiment.	High-beta tokamaks 25 p0054 A80-1778
Phase 1: A 150 kW photovoltaic concentrator	MHD stability limits on high-beta tokamaks
<pre>power system for load-center applications with feedback into the utility grid</pre>	25 p0054 A80-1779
[DOE/CS-34267/1] 25 p0145 N80-13688	Experimental enthalpies for a mixture of 80 mole percent isobutane in isopentane
Self-reconfiguring solar cell system [NASA-CASE-LEW-12586-1] 25 p0 153 N80-14472	[EPBI-ER-1034] 25 p0 118 N80-1193
[NASA-CASE-LEW-12586-1] 25 p0 153 N80-14472 POWEE EFFICIENCY	PHESSURE MEASUREMENTS
A theoretical method for estimation of power loss	Dissociation pressure measurements on salts proposed for thermochemical energy storage
due to mismatch in solar cell I-V characteristics	[SAND-79-8033] 25 p0160 N80-14532
25 p0C25 A80-12763 Power loss in photovoltaic arrays due to mismatch	PRESSURE REDUCTION Analysis of reservoir pressure and decline curves
in cell characteristics	in Serrazzano zone, Larderello geothermal field
25 p0028 A80-12815 Optimization of multi-layer front-contact grid	25 p0075 <b>A</b> 80-1920
patterns for solar cells	PRESSURE VESSELS Interim structural design standard for solar
25 p0028 A80-12816	energy applications, phases 1 and 2 boiler
The possibilities of increasing gas turbine efficiency	and pressure vessel code
25 p0032 A80-13024	[SAND-79-8183] 25 p0146 N80-13698 PRESTRESSING
Evaluation of conductor mass and necessary voltage	Evaluation of feasibility of prestressed concrete
level for large satellite solar arrays 25 p0036 A80-14595	for use in wind turbine blades
Selective ray-absorption as means of increasing	[NASA-CR-159725] 25 p0170 N80-15553 PRIMARY BATTERIES
the efficiency of a high-temperature solar	The electrochemical characteristics of iron
<pre>energy system for Stirling engine and solar thermal rocket</pre>	sulphide in immobilized salt electrolytes
25 p0036 A80-14597	25 p0013 A80-11862 Recent advances in high temperature primary
Simplified theory of nonuniform electrical conduction for an open cycle MHD generator with	lithium batteries
shaped magnetic induction	25 p0013 A80-11863 Lithium inorganic electrolyte battery development
25 p0047 A80-16997	[AD-A0/3858] 25 c0157 N80-14505
The ampere-hour efficiency of photovoltaic solar generators	PROBABILITY DENSITY PUNCTIONS
25 p0047 A80-16999	Evaluation of nuclear power plant siting by probabilistic assessment of environmental impact
Influence of the loading factor on the performance characteristics of series MHD generators	L VTT-EN-24 ] 25 p0 118 N80-11891
25 p0061 A80-18137	PROBABILITY THEORY Solar cooling performance predictions via
Power conversion efficiency monitoring in	stochastic weather algorithms
photoelectrochemical and other solar cells 25 p0062 A80-18214	25 p0020 A80-12430
POWER LINES	Modeling and simulation of WECS assisted utility systems Wind-Electric Conversion System
The 50kA flux pump for the superconducting transmission line test bed	25 p0088 A80-20887
[LA-6953-MS] 25 p0094 N80-10443	PROCESS CONTROL (INDUSTRY) Near-term prospects for solar industrial process
Energy analysis of the basic materials utilized in	heat heat
electric power transmission systems [HCP/T5043-01] 25 p0157 N80-14510	25 p0018 A80-11988
POWER PLANTS	Optimal oil yield from in situ oil shale retorting 25 p0038 A80-14795
The influence of thermophysical properties on the	Mathematical modeling of coal gasification processes
design and sizing of geothermal power plant components	25 p0089 A80-20913
[ASHE PAPER 79-WA/HT-18] 25 p0070 A80-18593	Automated longwall guidance and control systems, phase 1
Heber geothermal demonstration power plant [EPRI-ER-863] 25 p0114 N80-11607	[NASA-CR-161329] 25 p0122 N80-12538
Waste heat rejection from geothermal power stations	Automated longwall guidance and control systems, phase 2, part 2: Vertical control system (VCS)
[ORNL/TM-6533] 25 p0125 N80-12575 POWER SERIES	[ NASA-CH-161330 ] 25 n0122 NA0-12530
Modified power law equations for vertical wind	Automated longwall guidance and control systems
profiles	phase 2, part 2: RCS, FAS, and MCS [NASA-CR-161331] 25 p0122 N80-12540
[NASA-TH-79275] 25 p0138 N80-13623 POWER SUPPLY CIRCUITS	PRODUCT DEVELOPMENT
Solar cells in practice	Development of space quality silicon solar cells at B.A.B.C.
25 p0083 A80-19844	25 n0025 a80-12762
Unconventional circuits for static voltage transformers	PRODUCTION ENGINEERING
[BMFT-FB-T-78-26] 25 p0107 N80-11368	The challenge of efficiently retorting very nonuniform beds of oil shale rubble
PRECIPITATION (CHEMISTRY)	25 n0085 ago-20453
On-line tests of organic additives for the inhibition of the precipitation of silica from	Economics of gasoline production from underground
hypersaline geothermal brine. 2: Tests of	coal gasification via mobil-H process [CONF-790405-12] 25 p0106 N80-11246
nitrogen-containing compounds, silanes, and additional ethoxylated compounds	The automated array assembly task of the low-cost
[UCID-18195] 25 p0 110 N80-11567	Silicon Solar array project, phase 2
PREDICTION ANALYSIS TECHNIQUES	Phase 2 of the array automated assembly task for
Validation of computer models for predicting radiation levels on tilted surfaces	the low cost silicon solar array project
25 p0020 A80-12429	[NASA-CB-162426] 25 p0110 N80-11565 Status of the PEATGAS process
	[CONF-781045-3] 25 p0120 N80-12199

SUBJECT INDEL QUENCHIEG (COOLING)

RODUCTION PLANNING	Impact of flywheel-transmissions on automobile performance: A logical basis for evaluation
Economic structure, aggregate production functions and the demand for energy as an intermediate	[UCBL-52758] 25 p0137 N80-13480
product: A preliminary analysis	Energy storage system for automobile propulsion,
[DOE/EIA-0103/8] 25 p0096 N80-10607 PROFILE METHOD (FORECASTING)	1978 study. 2: Detailed report [UCRL-52553-VOL-2] 25 p0181 880-15995
MEDEE 2: A model for long term energy demand	PROPYLENE
evaluation 	Behaviour of the secondary lithium electrode on alloying substrates in propylene carbonate based

applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASHE PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells 25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10] 25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells 25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ABRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ABRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boilet/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  Color graphic controls for the solar central receiver test facility  Performance of solid compound parabolic concentrators in series  25 p0022 A80-12626  Power loss in photovoltaic arrays due to mismatch in cell characteristics
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ABRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boilet/receiver for solar energy conversion [ASHE PAPER 79-Wa/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells 25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  Color graphic controls for the solar central receiver test facility  Performance of solid compound parabolic concentrators in series  25 p0022 A80-12626  Pender loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-18569  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage
applications  25 p0031 A80-13003 Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-18569  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boilet/receiver for solar energy conversion [ASHE PAPER 79-Wa/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  25 p028 A80-12816  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells 25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  Color graphic controls for the solar central receiver test facility  Performance of solid compound parabolic concentrators in series  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  25 p0028 A80-12816  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boilet/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  Enhanced power generation of GSS/4/PS by optical
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0002 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  25 p0028 A80-12816  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  25 p0036 A80-14595  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAH ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  Color graphic controls for the solar central receiver test facility  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  25 p0036 A80-14595  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station
applications  25 p0031 A80-13003 Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  Enhanced power generation of GSS/4PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948
applications  25 p0031 A80-13003 Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  Enhanced power generation of GSS/4PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  25 p0028 A80-12816  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  25 p0036 A80-14595  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948  SHADE - A computer model for evaluating the
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUN VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  Color graphic controls for the solar central receiver test facility  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948  SHADE - A computer model for evaluating the optical performance of two-axis tracking
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948  SHADE - A computer model for evaluating the optical performance of two-axis tracking parabolic concentrators
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  25 p0028 A80-12816  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  25 p0036 A80-14595  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948  SHADE - A computer model for evaluating the optical performance of two-axis tracking parabolic concentrators  [ASME PAPER 79-WA/SOL-131]  25 p0068 A80-18581
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  Color graphic controls for the solar central receiver test facility  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  25 p0028 A80-12816  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948  SHADE - A computer model for evaluating the optical performance of two-axis tracking parabolic concentrators  [ASME PAPER 79-NA/SOL-13]  25 p0068 A80-18581  The satellite power system concept and program
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boilet/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948  SHADE - A computer model for evaluating the optical performance of two-axis tracking parabolic concentrators  [ASME PAPER 79-WA/SOL-13]  25 p0086 A80-18581  The satellite power system concept and program [SAWE PAPER 1305]  25 p0086 A80-20643
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boilet/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948  SHADE - A computer model for evaluating the optical performance of two-axis tracking parabolic concentrators  [ASME PAPER 79-WA/SOL-13]  25 p0086 A80-18581  The satellite power system concept and program [SAWE PAPER 1305]  25 p0086 A80-20643
applications  25 p0031 A80-13003  Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUM VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  25 p0067 A80-18569  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  25 p0028 A80-12816  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  25 p0036 A80-14595  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0038 A80-14948  SHADE - A computer model for evaluating the optical performance of two-axis tracking parabolic concentrators  [ASME PAPER 79-WA/SOL-13]  The satellite power system concept and program  [SAME PAPER 1305]  Materials testing for central receiver
Evaluation of sintered SiC as an electrode and container material in sodium/sulfur cells  25 p0035 A80-14588  SODIUN VAPOR  The thermal design and analysis of an integrated sodium boiler/receiver for solar energy conversion [ASME PAPER 79-WA/SOL-10]  SOLAE ARRAYS  Theory of the direct coupling between D.C. motors and photovoltaic solar arrays  Color graphic controls for the solar central receiver test facility  25 p0005 A80-11334  Color graphic controls for the solar central receiver test facility  25 p0022 A80-12626  Performance of solid compound parabolic concentrators in series  25 p0024 A80-12749  Power loss in photovoltaic arrays due to mismatch in cell characteristics  25 p0028 A80-12815  Optimization of multi-layer front-contact grid patterns for solar cells  25 p0028 A80-12816  Evaluation of conductor mass and necessary voltage level for large satellite solar arrays  Enhanced power generation of GSS/4/PS by optical solar reflectors Gravitationally Stabilized Solid-State-Satellite Solar-Power Station  25 p0036 A80-14948  SHADE - A computer model for evaluating the optical performance of two-axis tracking parabolic concentrators  [ASME PAPER 79-WA/SOL-13]  25 p0068 A80-20643  Materials testing for central receiver solar-thermal power systems

SOLAR COLLECTORS SUBJECT INDEX

Effect of thin oxide layer on the current voltage	The physics and chemistry of solar cells
relations of Schottky barrier solar cells 25 p0026 A80-12772	25 p0073 A80-18751 Synthetic molecular organizates
Techno-economic feasibility analysis of solar cells with and without concentrators for rural	25 p0073 A80-18752 Solar cells in practice 25 p0083 A80-19844
lighting 25 p0026 A80-12773 GaAs-electrolyte photovoltaic cells	The effect of fluorescent wavelength shifting on solar cell spectral response
25 p0026 A80-12774	25 p0086 A80-20715 Preparation and properties of
Reliability studies on thin film solar cells for satellite application 25 p0027 A80-12775	Au-/n/AlxGa1-xAs-/n/GaAs Schottky barrier solar cells
Experimental investigation of various barrier metals for Schottky barrier and MOS solar cells 25 p0027 A80-12776	25 p0086 A80-20716 Measurements of minority-carrier diffusion length in heterojunction solar cells
Review of the work done at C.E.E.R.I. on the development of single crystal silicon solar cells for use with concentrated light	25 p0086 A80-20717 Schottky barrier height, photovoltage and photocurrent in liquid-junction solar cells
25 p0027 A80-12777  Design and development of a 100 peak watt photovoltaic concentrator system	25 p0087 A80-20723  Temperature dependence of open-circuit  photovoltage of a back-surface field  semiconductor junction
25 p0027 A80-12778 Effect of image force on the characteristics of	25 p0087 A80-20727
MOS solar cell 25 p0028 A80-12785	Analysis and evaluation of isotype heterojunction solar cells
Bogus-type treatment of Cu2S-CdS solar cells using deposition from solution	25 p0087 A80-20734 Computer analysis of grids currently used for
25 p0028 A80-12788 Some experimental studies on the technical	CdS/Cu2S solar cells 25 p0089 A80-20893
developments of low cost silicon solar cells 25 p0028 A80-12789	Analytical evaluation of a solar thermophotovoltaic (TFV) converter
Optimization of multi-layer front-contact grid patterns for solar cells	[SAND-79-0504C] 25 p0099 N80-10638 Silicon solar cell process development,
25 p0028 A80-12816	fabrication and analysis, phase 1 [NASA-CR-162427] 25 p0109 N80-11561
Efficient shallow-homojunction GaAs solar cells by molecular beam epitaxy	Electron radiation damage of (AlGa) As-GaAs solar
25 p0035 A80-13986 Thermodynamic analysis of thermomechanical solar	cells [NASA-CR-162425] 25 p0110 N80-11564
energy converters operating in conjunction with solar cells	Satellite Power Systems (SPS) concept definition study. Volume 4: SPS point design definition
25 p0035 A80-14592 High-voltage multijunction solar cell 25 p0035 A80-14593	[NASA-CR-150683] 25 p0119 N80-12106 Theoretical analysis of multi-cell, high efficiency broad spectral sensitivity solar cells
Solar cell spectral response characterization	25 p0138 N80-13617 Novel concentrator photovoltaic converter system
25 p0037 A80-14685 Application of solar and fuel cell technology to industrial users	development [SAND-79-7040] 25 p0143 N80-13661
25 p0037 A80-14707 Efficient indium tin oxide/polycrystalline silicon solar cells	Low cost solar cells based on amorphous silicon electrodeposited from organic solvents [SAN-0113-T3] 25 p0145 N80-13678
25 p0039 A80-15136	Silicon concentrator solar cell manufacturing
Calculated and measured efficiencies of thin-film shallow-homojunction GaAs solar cells on Ge	development [SAND-79-7021] 25 p0 146 N80-13697
substrates 25 p0039 180-15141	Self-reconfiguring solar cell system [NASA-CASE-LEH-12586-1] 25 p0153 N80-14472
Photoconverter with bilateral sensitivity 25 p0044 A80-16625	Photovoltaic incentives options [HCF/CS-0023] 25 p0162 N80-14561
Broadband varizone Ga/1-x/Al/x/As-Si-photoelectric converters with an illuminated n-region	Analysis of GaAs and Si solar cell arrays for earth orbital and orbit transfer missions
25 p0044 A80-16626 Photoelectric parameters of photoelectric	[NASA-TM-81383] 25 p0167 N80-15204 Space solar cells: High efficiency and radiation
converters in relation to illumination 25 p0044 A80-16627	damage [NASA-TH-61367] 25 p0170 N80-15554
Analysis of the optical characteristics of silicon photoelectric converters with bilateral	Characterization of three types of silicon solar cells for SEPS deep space missions. Volume 1:
sensitivity 25 p0044 A80-16628	Current-voltage characteristics of OCLI BSF/BSR 10 ohm-cm, and BSR 2 ohm-cm cells as a function
A theoretical evaluation and optimization of the radiation resistance of gallium arsenide	of temperature and intensity [NASA-TM-78253] 25 p0171 N80-15562
solar-cell structures 25 p0046 A80-16794	A survey of photovoltaic systems [NASA-CR-150696] 25 p0171 N80-15563
AlGaAs tunnel diode 25 p0046 A80-16799	Design and performance of silicon solar cells under concentrated sunlight
The ampere-hour efficiency of photovoltaic solar qenerators	[SAND-79-1165C] 25 p0 172 N80-15577 SOLAR COLLECTORS
25 p0047 A80-16999 Photovoltaic solar cell array used for	A new approach to low cost large area selective surfaces for photothermal conversion
supplemental power generation 25 p0061 A80-18129	25 p0003 A80-10845 Performance of an inexpensive constant flow solar
Power conversion efficiency monitoring in photoelectrochemical and other solar cells	collector/storage system in ground 25 p0003 A80-10846
25 p0062 A80-18214 Relating computer simulation studies with	Using a fin with a parabolic concentrator 25 p0004 A80-10847
interface state measurements on MIS sclar cells 25 p0062 A80-18231	The effects of axial conduction on collector heat removal factor
Thermal energy utilization in the Mississippi County Community College Photovoltaic Project	25 p0004 A80-11333 A theoretical study of laminar free convection in
[ASME PAPER 79-WA/SOL-29] 25 p0068 A80-18575	1-D solar induced flows 25 p0005 A80-11337

Derivation of method for predicting long term average energy delivery of solar collectors Simple procedure for predicting long term average performance of nonconcentrating and of concentrating solar collectors Economy of a retrofit solar system --water heating 25 p0017 A80-11984 Commercial building and industrial applications for solar energy 25 p0017 A80-11985 Near-term prospects for solar industrial process 25 p0018 A80-11988 Materials resource requirements and potential limitations in solar energy products 25 p0018 A80-11990 Computers in the design of solar energy systems 25 p0020 A80-12426
A high performance porous flat-plate solar collector
25 p0021 A80-12438 Modeling of a thermal wall panel using phase change materials 25 p0021 A80-12439 Heliostat Beam Characterization System --computerized wideo radiometer technique for solar collector 25 p0022 A80-12627 Effect of boosters on the performance of flat plate collector 25 p0023 A80-12744 Solar energy flat plate collectors - Optimization of air gap 25 p0023 A80-12745 Transient rise of plate temperature in solar collectors 25 p0023 A80-12746 An investigation of experimental performance of a compound parabolic concentrator 25 p0023 A80-12748 Performance of solid compound parabolic concentrators in series 25 p0024 A80-12749 A seasonally adjusted concentrating collector made of mirror strips 25 p0024 A80-12750 A parametric study of solar thermal power plant 25 p0024 A80-12753 Economics of small solar power plants --- in rural 25 p0C24 A80-12754 Performance studies on uniform illumination type nontracking concentrators 25 p0026 A80-12766 Techno-economic feasibility analysis of solar cells with and without concentrators for rural lighting 25 p0026 A80-12773 Review of the work done at C.E.E.R.I. on the development of single crystal silicon solar cells for use with concentrated light 25 p0027 A80-12777 Solar absorption spectra of PbS-Al and PbSe-Al systems 25 p0027 A80-12781 An electronic device for intermittent tracking --of sun in solar collectors 25 p0027 A80-12782 Solar concentrator with polyester film for reflecting surface and pendulum arrangement for tracking movement 25 p0027 A80-12784 Calculation of monthly mean solar radiation for horizontal and inclined surfaces 25 p0028 A80-12817 Calculation of climatic solar heating performance 25 p0029 A80-12820 An experimental study of corrugated steel sheet 25 p0029 A80-12822 Truncation of nonimaging cusp concentrators --solar collector geometry

Plat-plate solar collector materials

Solar collectors as energy converters

## PERSONAL AUTHOR INDEX

ENERGY/A Continuing Bibliography (Issue 25)

**APRIL 1980** 

## Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The issue, page and accession numbers are located beneath and to the right of the title, e.g., 25 p0180 N80-15687 Under any one author's name the accession numbers are arranged in sequence with the IAA accession numbers appearing first.

AAMODT, R. E.
Drift wave stability and transport theory in fusion systems

## **CORPORATE SOURCE INDEX**

ENERGY / A Continuing Bibliography (Issue 25)

**APRIL 1980** 

## Typical Corporate Source Index Listing

The title of the document is used to provide a brief description of the subject matter. The issue, page number and NASA or AIAA accession number are included in each entry to assist the user in locating the abstract in the abstract section of an individual supplement of Energy. If applicable, a report number is also included as an aid in identifying the document.

```
ACRES AMERICAN, INC., BUFFALO, N. Y.
      Peasibility of compressed air energy storage as
         a peak shaving technique in California, Volume 2 [SAN-1331-T1] 25 p0174 N80-15596
ACUREX CORP., MOUNTAIN VIEW, CALIF.

Comparison of geothermal energy with coal, oil, and natural gas for selected uses [DOE/ET-27139-1] 25 p0123 N80-12558

WEGHAN CO., INC., BUFFALO, H. Y.

Methane recovery from sanitary landfills; gas recovery system installation and testing [PB-296622/4] 25 p0107 N80-11254

WEST VIRGINIA UNIV., MORGANTONN.

Effect of vertical scale distortion on the temperature field of a thermal-hydraulic model [PB-297274/3] 25 p0108 N80-11551

WESTINGHOUSE ELECTRIC CORP., EDDYSTONE, PA.

Screening evaluation of novel power cycles integrated with gasification plants [EPRI-AF-1002] 25 p0096 N80-10605

WESTINGHOUSE ELECTRIC CORP., PITTSBURGH, PA.

Conceptual design of a Demonstration Tokamak Bybrid Reactor (DTHR) [WFS-THE-107] 25 p0132 N80-12898

WESTINGHOUSE RESEARCH AND DEVELOPMENT CENTER, PITTSBURGH, PA.

Performance monitoring of an off-peak heating and cooling system utilizing thermal storage and solar augmented heat pump [EPRI-ER-845] 25 p0102 N80-10662

WHARTON (E. F. A.), INC., PHILADELPHIA, PA.

Wharton annual energy model: Development and simulation results [EPRI-EA-1115] 25 p0175 N80-15606

WILLIAMS (O. G.) AND SKAGGS (R. L.), LAS VEGAS, NEV.

Solar parabolic trough forming process [ALO-4158-1] 25 p0116 N80-11626

WISCONSIN UNIV. - HADISON.

Newton's method for generalized equations and the PIES energy model 25 p0149 N80-13872

WISCONSIN UNIV. CENTER SYSTEM, RICE LAKE.

Energy and economic assessment of anaerobic digesters and biofuels for rural waste management [PB-296523/4] 25 p0094 N80-10398

WORLD HETEOROLCGICAL CRGANIZATION, GENEVA (SWITZERLAND).

Climatic variability, marine resources and offshore development 25 p0131 N80-12689

WYLE LABS., INC., HUNTSVILLE, ALA.

Thermal performance evaluation of the Suncatcher SH-11 (liquid) solar collector [NASA-CR-161253] 25 p0156 N80-14497

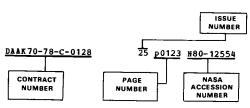

Results of thermal performance evaluation of the Owens-Illinois sunpack liquid solar collector at indoor conditions [NASA-CR-161189] 25 p0156 N80-14500

# CONTRACT NUMBER INDEX

ENERGY /A Continuing Bibliography (Issue 25)

**APRIL 1980** 

#### Typical Contract Number Index Listing

istings in this index are arranged alphanumerically by contract number. Under ach contract number, the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged assending order with the IAA accession numbers appearing first. The occession number denotes the number by which the citation is identified in their the IAA or STAR section. Preceding the accession number are the issue and page number in the particular supplement in which the citation may be bound.

# REPORT/ACCESSION INDEX

## ENERGY /A Continuing Bibliography (Issue 25)

#### **APRIL 1980**

## Typical Report/ Accession Number Index Listing

Listings in this index are arranged alphanumerically by report number. The issue and page number indicate the actual Supplement and page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (\*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

#### **PUBLIC COLLECTIONS OF NASA DOCUMENTS**

#### **DOMESTIC**

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

CALIFORNIA

University of California, Berkeley

**COLORADO** 

University of Colorado, Boulder

DISTRICT OF COLUMBIA

Library of Congress

**GEORGIA** 

Georgia Institute of Technology, Atlanta

ILLINOIS

The John Crerar Library, Chicago

**MASSACHUSETTS** 

Massachusetts Institute of Technology, Cambridge

MISSOURI

Linda Hall Library, Kansas City

**NEW YORK** 

Columbia University, New York

**OKLAHOMA** 

University of Oklahoma, Bizzell Library

PENNSYLVANIA

Carnegie Library of Pittsburgh

WASHINGTON

University of Washington, Seattle

NASA publications (those indicated by an "\*" following the accession number) are also received by the following public and free libraries:

**CALIFORNIA** 

Los Angeles Public Library San Diego Public Library

COLORADO

**Denver Public Library** 

CONNECTICUT

Hartford Public Library

MARYLAND

Enoch Pratt Free Library, Baltimore

**MASSACHUSETTS** 

**Boston Public Library** 

**MICHIGAN** 

**Detroit Public Library** 

**MINNESOTA** 

Minneapolis Public Library

MISSOURI

Kansas City Public Library St. Louis Public Library

NEW JERSEY

Trenton Public Library

**NEW YORK** 

Brooklyn Public Library

Buffalo and Erie County Public Library

Rochester Public Library New York Public Library

OHIO

Akron Public Library

Cincinnati Public Library

Cleveland Public Library

**Dayton Public Library** 

Toledo Public Library

**TENNESSEE** 

Memphis Public Library

**TEXAS** 

Dallas Public Library

Fort Worth Public Library

WASHINGTON

Seattle Public Library

WISCONSIN

Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

#### **EUROPEAN**

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "#" and "\*", from: ESA Information Retrieval Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.

## NASA CONTINUING BIBLIOGRAPHY SERIES

FREQUENCY	TITLE	NUMBER	
Monthly	AEROSPACE MEDICINE AND BIOLOGY	NASA SP-7011	
	Aviation medicine, space medicine, and space biology		
Monthly	AERONAUTICAL ENGINEERING	NASA SP-7037	
	Engineering, design, and operation of aircraft and aircraft components		
Semiannually	NASA PATENT ABSTRACTS BIBLIOGRAPHY	NASA SP-7039	
	NASA patents and applications for patent	46	
Quarterly	EARTH RESOURCES	NASA SP-7041	
	Remote sensing of earth resources by aircraft and spacecraft		
Quarterly	ENERGY	NASA SP-7043	
	Energy sources, solar energy, energy -conversion, transport, and storage		
Annually	MANAGEMENT	NASA SP-7500	
	Program, contract, and personnel		

Details on the availability of these publications may be obtained from:
